## Publishing Conditions

Hillah Heritage Quarterly Authorized Journal receives all the original scientific researches under the Provisos below:

1. Researches or studies to be published should strictly be according to the globally- agreed- on steps and standards.
2. Being printed on A4, delivering three copies and CD having approximately 5000-10.000 words under Simplified Arabic or Times New Roman font and being pagination.
3. Delivering the Abstracts, Arabic or English, not exceeding a page, 350 words, with the research title.
4. The front page should have the title, the name of the researcher/ researchers, occupation, address, telephone number and e-mail, and taking cognizance of averting a mention of the researcher/researchers in the context.
5. Making an allusion to all sources in the endnotes, and taking cognizance of the common scientific procedures

in documentation; the title of the book, editor, publisher, publication place, version number, publication year and page number. Such is for the first mention to the meant source, but if being iterated once more, the documentation should be only as; the title of the book and the page number.

6. Submitting all the attached sources for the marginal notes, in the case of having foreign sources, there should be a bibliography apart from Arabic one, and such books and researches should be alphabetically ordered.
7. Printing all tables, pictures and portraits on attached papers, and making an allusion to their sources at the bottom of the caption, in time there should be a reference to them in the context.
8. Attaching the curriculum vitae, if the researcher cooperates with the journal for the first time, so it is to manifest whether the actual research submitted to a conference or a symposium for publication or not. there should be an indication to the sponsor of the project, scientific or nonscientific, if any.
9. For the research should never have been published be-

fore, or submitted to any means of publication.

10. In the journal do all the published ideas manifest the viewpoints of the researchers themselves; it is not necessary to come in line with the issuing vicinity, in time, the research stratification is subject to technical priorities.
11. All researches are exposed to confidential revision to state their reliability for publication. No research retrieved to researchers, whether they are approved or not; it takes the procedures below:
  - A researcher should be notified to deliver the meant research for publication in a two-week period maximally from the time of submission.
  - A researcher whose paper is approved is to be apprised of the edition chief approval and the eminent date publication.
  - With the rectifiers reconnoiters some renovations or depth, before publishing, the researchers are to be retrieved to the researchers to accomplish them for publication.
  - Notifying the researchers whose research papers are

not approved; it is not necessary to state the reasons and wherefores of the disapproval.

- Researches to published are only those given consent by experts in the field.
- A researcher bestowed a version in which the meant research published, and a financial reward of (150,000) ID.

12. Taking into consideration some points for the publication priorities, as follows:

- Research participated in conferences and adjudicated by the issuing vicinity.
- The date of research delivery to the edition chief.
- The date of research that has been renovated.
- Ramifying the scope of the research when possible.

13. Receiving research be by correspondence on the E-mail of the Journal ([turathhi@gmail.com](mailto:turathhi@gmail.com)) or delivered directly to the Journal's headquarters at the following address: (Iraq, Babylon Governorate, Al-Hillah City, Al-Tuhmaziya Street, Infront of Al-Turkey Hospital, Hillah Heritage Center).

## Editorial

### In the name of Allah, the Compassionate, the Merciful A Humanity Eagers to the Knowledge

Praise be to Allah, Lord of the Worlds, and peace and blessings be upon the one who came with knowledge and science and he made them distinctive among the creatures and made ethics a measure of their behavior and balance, and on Ahal Al-Beit, the sun of darkness.. and after...

The writing in one of our distinguished scientists requires us to take note of his life, the works that he has produced and also his compositions. As for life, some of them are general, it's knowledge comes to the public and the private, it was written in historical books, The follower gets it as a result of the transfer and viewing of the contemporaries; but this method does not pay off all the time; some lives can not be reached, because those who included them have secrets; As a result of isolation from society or for certain reasons (which may be political or pious) or as the result of mixing responsibility for study and teaching; and there is no doubt that these secrets can be obtained only in two ways:

**The first:** His son, if he was following in the footsteps of his father.

**Second:** The best of his students who are close to him.

The two ways -history books- and what his closers narrators of an ideal case.

As for the second way, it is the path that Ahal Al-Beith (PBUT) have urged us to follow it , when they said: (**Our speech is difficult and hard to bear; only an angel close, or a prophet who is sent, or a man , may God test his heart for faith**). The reason for this is that when you analyze the words of one of them, you know something about his scientific personality, his power and his works and even knows the social and intellectual situation prevailing in his time, and this because of the implicit pattern, which is usually referred to in the folds of their words (PBUT).

Yes, a great proportionality, in this, but do not stop the presence, whereas positive in the attempt and recovery; As it shows in the interview between Al-Allamah and his son, when he asked his son : “How do you want to be?”.

“I want to be just like you”. His son replied.

“I tried to be like the Commander of the faithful, so I became Al-Alammah”.

He referred to take the highest and the most perfect example.

The study of the intellectual output of the scientist, guides us to the way of his thinking, his scientific achievements, and the way of his studying to the difficult scientific issues; It is the best and most appropriate way to study the life of the thinker and the scientist; because when you dwell in himself, you know who you are talking to and who you are speaking with. Imam Ali (PBUH) said: **(We should speak to know, the one's is hidden under his tongue).**

**This Issue** is the Special Issue that the administration of the center has decided to be about a scientist who is eager for virtue, and he seek about knowledge; namely, Al-Alammah Al-Hilli (D. 726H.). This issue included studies those touched some of the truth that Al-Alammah has. I mean the intellectual aspect; because some of his ideas and theories are still uncover, and his works touched only a few of them. Some of them are under investigation, some of which have recently been achieved in our center, such as ((Audit observatories and investigation purposes)) in Logic, and the time will reveal much of his rich knowledge by the efforts of those who are in particular, Especially Mr. Al-Safi -May God protect him-, who has always provided us with thought and knowledge; and blessed him as a father, and as a thinker.

**Sadiq Al-Khuweildi**  
**The Editor-in-Chief**

## The Editorial of the Advisory and the Editorial Boards

Among the most important Islamic scientific cities, Hillah has for four centuries been regarded as the pillar of guarding the Islamic thought from squander and loss. Thanks to its scientists and their profound faith that the whole region and the sacred cities escaped the miseries of wars and invasions that struck the region. Due to these reasons, Hillah embraced all causes of scientific integration and prosperity: schools of science and thought have spread, gathering worldwide researchers.

To revive this magnificent history, the Hillah Heritage Center has taken the initiative of this noble mission through its blessed labour to restore the works of this city's scientists through uncovering the treasures of knowledge, education, and jurisprudence of Hillah which is also known as «the city of science and scientists». The Hillah Heritage Center sets itself the task of highlighting the scientific, educational, and jurisprudent

roles of Hillah's past and present scientists.

Sustaining this huge heritage is the core responsibility of the Hillah Heritage Center which is blessed by its affiliation to Al-Abbas Holy Shrine which is, in turn, highly interested in reviving this heritage and encouraging scientific research to put emphasis on the leading role of Hillah in this respect.

The significance of this journal lies in publishing scientific researches related to the scholars of Hillah and their political, social, economic, intellectual, and historical domains, to mention but few. Thus, it is a unique opportunity for researchers and writers to publish their works in this referred journal which hopes to spread the scientific, intellectual, jurisprudent, and civilized heritage of Hillah.

Taking onto its shoulder the task of highlighting this huge heritage of Hillah, the Hillah Heritage Center has introduced this journal to the academics of universities in the middle and southern of Iraqi, instigating them to write about everything that is related to the heritage of Hillah as well as the recent scientific subjects. Consequently, Turath Al-Hillah aims at:

1. Introducing the various domains of knowledge adopted

by the scientists of Hillah, especially those which distinguished this city from other Islamic cities.

2. Publishing referred scientific researches that tackle the civilization of this governorate, particularly those which reflect the extents of its development in dealing with modern subjects like the civilized relics and archeological investigation as realized through a modern scientific vision.
3. Investigating what has not been studied yet of the rich heritage of Hillah.
4. Examining the cultural treasures and relics of Hillah.
5. Emphasizing the scientific and humanitarian status of those scientists.
6. Exploring the circumstances and conditions in which those scientists lived.
7. Encouraging researchers to enter the domain of examining scripts and ancient works.
8. Producing a comprehensive and scientific encyclopedia of Hillah scientists through research and investigations in the world Islamic libraries.

9. Advancing the scientific research that is specialized in the art of examining scripts by establishing the Scripts Examination Unit in this Center.
10. Producing abridged encyclopedias by investigating the past and present scientists, quantifying and publishing their works through compilation, examination and composition.
11. Highlighting the features of the scientific and intellectual revival of the distinguished scientists and publishing their works.

Finally, we would like to welcome researchers from the different scientific institutions, universities and research centers, inside and outside Iraq, to provide our journal with their sound researches that will later make an important foundation which will, hopefully, enrich specialists', researchers', and students' knowledge. The center is also ready to provide the researchers with various unexamined references, resources, and scripts to investigate and examine them. They are highly welcome in the Hillah Heritage Center at any time.

All praise be, first and last, to Allah, Lord of the Universe!
